

Providing a World of Medical Support...

Unistrut® has been involved in the engineering, design and installation of medical equipment support systems for over five decades. Our proven systems support X-ray equipment, surgical lighting, service columns, microsurgery units, as well as other specialized medical equipment in healthcare facilities worldwide. Unistrut's support extends well beyond quality products to include in-depth planning, engineering, computer-aided design, fabrication, and installation . . . *a full range of services only Unistrut® can provide.*

You can count on Unistrut quality from the point of manufacture all the way through project installation. The result is a single source supplier that provides reliable, consistent medical support systems that will meet or exceed specifications.

Medical Support Applications:

- ◆ CRT Monitor Supports
- ◆ X-Ray Equipment Supports
- ◆ Service Column Supports
- ◆ Microscope Supports
- ◆ Gas Columns Supports
- ◆ Injector Systems Supports
- ◆ Lead Shielding Supports
- ◆ Physical Therapy Supports
- ◆ Exam/Surgical Light Supports
- ◆ Patient Lift System Supports
- ◆ Boom Supports

Designed-in Strength & Versatility

Dependable performance begins with Unistrut's exclusive Telespar® Vertical support...

High-strength Telespar vertical supports formed from 12-gage, square steel tubing, are bolted directly to the overhead structure.

Telescopic design, with holes on one-inch centers, provides fast and easy on-site adjustment capability.

Quick micro adjustments lock in final height for precise horizontal alignment.

Unistrut Medical Support Systems are not visible after installation.
